Art Unit: 1723

OFFICE ACTION

Election/Restriction

1. Applicant's election without traverse of Group I and Species A in Paper No. 9 is acknowledged. Claims 32-91 are thereby withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention. Claims 1-31 are being treated on the merits.

Information Disclosure Statement

Note the attached PTO-1449 forms submitted with the Information Disclosure
 Statements filed 27 NOV 2001, 15 JUL 2002, and 2 DEC 2002.

Drawings

3. Applicant should verify that (1) <u>all</u> reference characters in the drawings are described in the detailed description portion of the specification and (2) <u>all</u> reference characters mentioned in the specification are included in the appropriate drawing Figure(s) as required by 37 CFR 1.84(p)(5).

Specification

4. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Art Unit: 1723

5. The disclosure is objected to because of the following informalities:

a. Page 11, line 9: replace "breaking" with --braking--.

Appropriate correction is required.

- 6. The abstract is acceptable.
- 7. The title is acceptable.

Claim Objections

8. Claim 9 is objected to because it depends from itself. It appears claim 9 should depend from claim 8.

Correction is required.

Double Patenting

9. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321© may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 1723

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

- 10. Claims 1, 5, and 10 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 3, and 6 of U.S. Patent No. 5,944,648. Although the conflicting claims are not identical, they are not patentably distinct from each other because pending claims 1, 5, and 10 in the instant application are embraced by the scope of patented claims 1, 3, and 6.
- 11. Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 6 of U.S. Patent No. 6,142,924.

 Although the conflicting claims are not identical, they are not patentably distinct from each other because pending claim 1 in the instant application is embraced by the scope of patented claim 6.
- 12. Claims 1 and 10 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 15 and 16 of copending Application No. 09/707,430. Although the conflicting claims are not identical, they are not patentably distinct from each other because pending claims 1 and 10 in the instant application are embraced by the scope of claims 15 and 16 in the '430 application.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Art Unit: 1723

Claim Rejections - 35 U.S.C. § 112, second paragraph

13. Claims 12, 14, 15, 20, and 22-31 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 12, line 1: the recitation of "a second motor" is confusing since no first motor has yet been recited.

Claim 15, line 2: "said conveyor screw" lacks antecedent basis.

Claim 20, line 1: "said drive shaft" lacks antecedent basis.

Claim 23, line 9: "said first and second arms" lacks antecedent basis - change to --said first and second arm assemblies--.

Claim 27, line 2: "said body member" lacks antecedent basis.

Claim 30, line 2: "said heavy material output cavity" lacks antecedent basis.

14. Each pending claim should be thoroughly reviewed such that these and any other informalities are corrected so the claims may particularly point out and distinctly

Art Unit: 1723

claim the subject matter which applicant regards as the invention, as required by 35 U.S.C. § 112, second paragraph.

Allowable Subject Matter

- 15. Claims 1, 5, 10, 12, 14, 15, 20, and 22-31 would be allowable if rewritten or amended to overcome the rejection under 35 U.S.C. § 112 and if the double patenting rejection is overcome by the filing of terminal disclaimer.
- 16. Claims 2-4, 6-9, 11, 13, 16-19, and 21 are allowable.
- 17. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The prior art of record does not teach or fairly suggest a centrifuge with the recited housing, central member, arm assembly including multiple tubes, and multiple flow paths defined by the tubes for the input mixture and separated light and heavy phases.

Conclusion

18. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The cited prior art discloses centrifuges with auger discharge devices.

19. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Charles Cooley whose telephone number is **©** (703) 308-0112.

Art Unit: 1723

20. Any inquiry of a general nature or relating to the status of this application should be directed to the Technology Center 1700 receptionist whose telephone number is (703) 308-0651.
